Feedback on the assignment, including any comments you may want to add on how your expertise / skillsets fit this assessment.

My coding background is mainly in backend coding, specifically algorithm design and security analysis. Until recently I had done very little frontend coding. I've used the Streamlit library for projects before so that was slightly familiar to me. I am also familiar with making API calls but had never built my own API endpoints before this. Information specific to the project (function, usage) can be found in the readme included in the project files.

Duration it took you to complete it.

This took me approximately ten hours to complete, including setup.
